Notes:

The council policy is that items are included in the Parish Council's Asset Register at their purchase price (please note – the asset value that the council assigns is different to the insurance value and insurance value is dealt with separately).

Notes below cover whether this also includes the cost of installation. **The asset value does not include VAT.**

Once recorded in the asset register, the recorded value of the asset will not change from year to year, unless the asset is materially enhanced. Commercial concepts of depreciation, impairment adjustments, and revaluations are not required or appropriate for this method of asset valuation. For reporting purposes therefore, the original value of fixed assets will usually stay consistent throughout their life until disposal (extract taken from Governance and Accountability for Smaller Authorities).

In a special case where an authority receives an asset at a zero cost (gift) the £1 proxy value is applied – this is the case with the Streetlights.
